

DATA ON PROTECTED AND INSUFFICIENTLY KNOWN INSECT SPECIES OBTAINED FROM THE INVERTEBRATE MONITORING IN LATVIA (2015 – 2016)

Maksims Balalaikins, Uldis Valainis, Nikolajs Savenkovs, Kristīna Aksjuta

Balalaikins M., Valainis U., Savenkovs N., Aksjuta K. 2016. Data on protected and insufficiently known insect species obtained from the invertebrate monitoring in Latvia (2015 – 2016). *Acta Biol. Univ. Daugavp.*, 16 (2): 139 – 150.

The current paper presents data on new findings of 66 protected or insufficiently known insect species found in Latvia during invertebrates monitoring activities in years 2015-2016. One species, *Amara nigricornis* Thomson, 1857 (Carabidae), is reported for the first time for the local fauna

Key words: biodiversity monitoring, insects, Latvia, fauna, new records, protected species.

INTRODUCTION

The studies devoted to the invertebrate diversity research in Latvia predominantly occurred in recent past and were mainly focused on protected nature areas that forms a strong bias for providing a complete view on the protected species occurrence in Latvian fauna. Also, there is a lack of information about temporal changes in abundance and range shifts due to climate change. Such data can be obtained on the basis of the results of species monitoring carried out throughout the country. The monitoring of invertebrates is a part of various national programs that are targeted on enhancement of biodiversity conservation. Various monitoring programmes targeted on research of different groups of invertebrates already been carried out all over the Europe. Dragonflies monitoring is

carried out in Switzerland (Hitterman et al. 2000), United Kingdom (Smallshire & Beynon 2009), The Netherlands (Bouwman et al. 2009) and United States (Panzer et al. 2005). The monitoring of butterflies species is carried in many European countries: The Netherlands, United Kingdom, Switzerland, Sweden, France, Portugal, Germany, Estonia, etc. (Elberg 1999, Van Swaay 2007). The moths monitoring is carried out in Finland since 1993 using light traps method (Söderman, 1994, Söderman et al. 1999). Similar methods are used for the control of separate moth species or groups of species (pests, as well as rare and protected species) (Kruus & Viidalepp 2001). The ground beetles is a broad group of entomophagous insects that have a critical role in various habitats. The beetles of this family belong to various ecological groups and have different requirements in respect of the environmental factors: pollution, amount of

food, quality of soil, type of vegetation and use of various chemicals (Döring et al. 2003). For these reasons the ground beetles were selected for conducting the respective monitoring activity. Invertebrate monitoring potentially can provide a chance to study and to understand which habitats and which species are good representatives for the whole country. During invertebrate monitoring, data on currently protected species and species that potentially might be protected in future needs to be collected, as well as other valuable information that can be used during the elaboration of conservation plans for particular species in future.

MATERIAL AND METHODS

The monitoring was implemented according to the national invertebrate monitoring methodology (Valainis et al. 2009), with several amendments during the approbation. The monitoring sites were located in 15 square shaped study plots all over the country (Fig. 1). The arrangement of sites was selected for the purpose of data extrapolation for whole territory of Latvia afterwards. In each square four transects with the pitfall traps, the

route for butterflies accounting, one light trap station and ten dragonflies accounting polygons were applied (Fig. 2).

Monitoring of ground beetles

The material was collected using a pitfall traps method. Pitfall traps were filled with the 50 % solution of ethylene glycol. Ten pitfall traps with 7 cm hole in diameter and 9 cm high, were placed in each of four linear transects. The traps were placed along the transect with 2 m distance from each other. In each square transects were applied according to one principle (Fig. 2). Pitfall traps were active only during the period of peak activity of carabid beetles, two times per season - two weeks in early summer and at the end of summer season. All material was collected and determined in laboratory. The material was processed focusing mainly on rare and protected species.

Monitoring of butterflies

The monitoring of butterflies was based on surveys with species accounting using route method. In each square one or more pre-marked

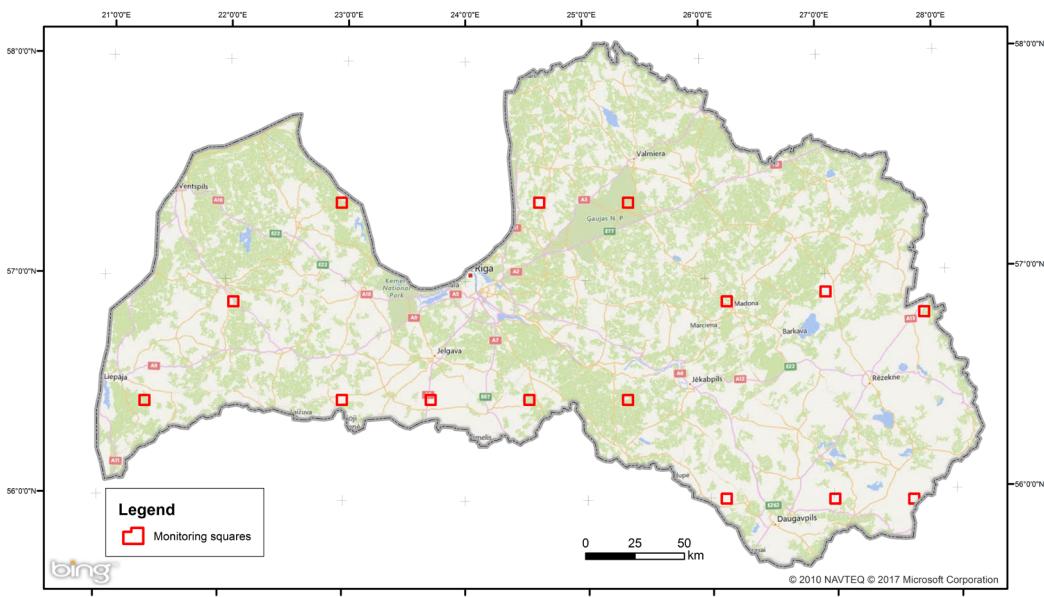

Fig. 1. The layout of invertebrate monitoring sites in Latvia.

routes in a total length of 2 km were surveyed. During the first year of monitoring, routes were revised, where it was necessary. All butterfly species 4-5 m on each side of route central line and 4-5 meters ahead were recorded. The monitoring of species was carried out three times a year during the following periods: from 25 May to 10 June, from 15 June to 30 June, from 15 July to 30 July. Butterflies mainly were determined in flight. Also, collected and determined in laboratory, if it was necessary.

Monitoring of dragonflies

The monitoring was based on dragonfly species accounting in the territory with pre-marked polygons. In each square ten species accounting polygons in suitable habitats for dragonfly species were pre-marked. During the first year of monitoring, polygons were revised, if it was necessary. The size of each polygon was 10x10 meters. All dragonfly species occurred in a polygon were recorded during 5 - 10 minutes time period. The monitoring was carried out three times a year during the following periods:

from 25 May to 10 June, from 15 June to 30 June, from 15 July to 30 July. Dragonfly species mainly were determined in flight. Also, collected and determined in laboratory, if it was necessary.

Moth monitoring

The monitoring was based on data collection using standartised light trap method. In each square a light traps station was mounted, facing the needs for electricity. Samples were collected from 15 June to 15 August. The traps were checked once a week. All material was collected and determined in laboratory.

RESULTS

In years 2015 and 2016 the monitoring of four insect groups (butterflies, moths, dragonflies and ground beetles) in 15 square shaped study plots all over the country was carried out. Leading experts on species groups were involved into current study to assure reliability of collected data. As a result of first two years, several records of new localities on different protected

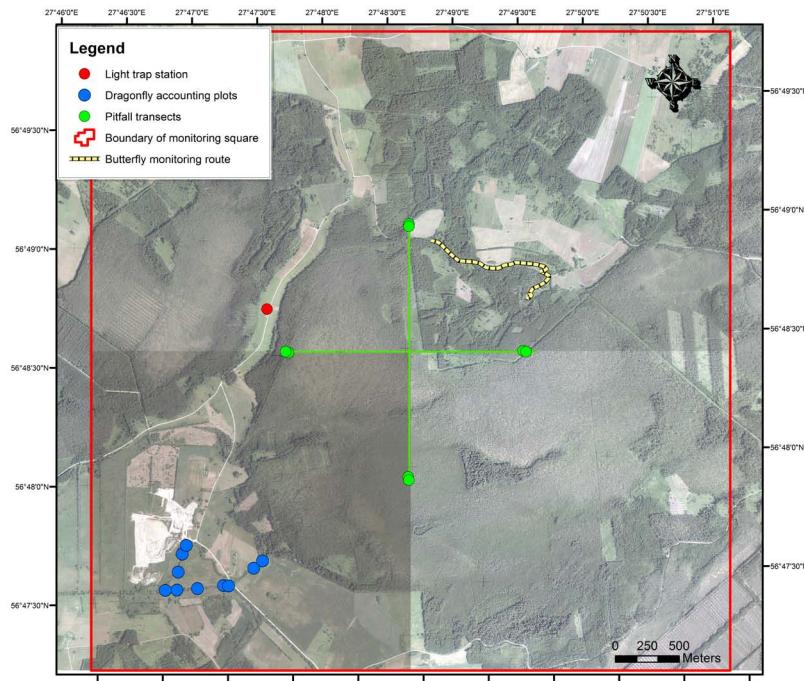

Fig. 2. The spatial arrangement scheme of the monitoring activities in one of the squares.

invertibrate species were reported, including 14 protected Lepidoptera and Odonata species, of them five species (*Leucorrhinia pectoralis*, *Ophiogomphus cecilia*, *Coenonympha hero*, *Euphydryas aurinia* and *Lycaena dispar*) are protected by the Habitat Directive, and included in Annex II (the Council Directive 92/43/EEC of 21 May 1992), four species (*Leucorrhinia albifrons*, *Leucorrhinia caudalis*, *Parnassius mnemosyne* and *Lopinga achine*) are included in Annex IV of current Directive. Twelve of reported species are protected according to local legislation. During the monitoring activities one species, *Amara nigricornis* Thomson, 1857, (Carabidae) was registered for Latvia for the first time and is reported as new to local invertibrate biota.

Geometridae Leach, 1815

Asthenia anseraria (Herrich-Schäffer, 1855) – **Priekuļi munic.**, Priekuļi parish, “Lejas Podiņi”, $25^{\circ} 21' 54.764''$ E $57^{\circ} 20' 55.159''$ N, 29.06.2016 (1, L. Taube).

Charissa ambiguata (Duponchel, 1830) – **Vecumnieki munic.**, Bārbele parish, “Gērķi”, $24^{\circ} 32' 25.085''$ E, $56^{\circ} 27' 40.494''$ N, 04.08.2016 (1, J. Dreimanis).

Chlorissa cloraria (Hübner, 1813) – **Krāslava munic.**, Izvalta parish, “Kļavinieši”, $27^{\circ} 0' 13.771''$ E $55^{\circ} 58' 27.621''$ N, 21.07.2015 (1, K. Aksjuta), 13.07.2016 (1, M. Balalaikins, I. Jakubāne); **Kārsava munic.**, Malnava parish,

“Reiziniņmājas”, $27^{\circ} 47' 26.795''$ E $56^{\circ} 48' 41.899''$ N, 13.07.2016 (1, M. Balalaikins, I. Jakubāne).

Chloroclysta infuscata (Tengström, 1869) – **Vecumnieki munic.**, Bārbele parish, “Gērķi”, $24^{\circ} 32' 25.085''$ E, $56^{\circ} 27' 40.494''$ N, 25.07.2015 (1, J. Dreimanis); 13.07.2016 (1, J. Dreimanis); **Jaunjelgava munic.**, Sece parish, “Druvenieki”, $25^{\circ} 21' 50.208''$ E $56^{\circ} 27' 20.557''$ N, 18.08.2016 (1, J. Dreimanis).

Cidaria fulvata (Forster, 1771) – **Limbaži munic.**, Gravas parish, “Strautiņi 2”, 13.07.2016 (1, L. Taube).

Cyclophora quercimontaria (Bastelberger, 1897) – **Kuldīga munic.**, Pelēči parish, “Bišavas”, $22^{\circ} 4' 7.229''$ E $56^{\circ} 53' 35.157''$ N, 18.08.2015 (1, K. Aksjuta), 01.07.2016 (1, K. Aksjuta, M. Nitcīs); **Vecumnieki munic.**, Bārbele parish, “Gērķi”, $24^{\circ} 32' 25.085''$ E, $56^{\circ} 27' 40.494''$ N, 04.08.2015 (1, J. Dreimanis), 21.07.2016 (1, J. Dreimanis); **Priekuļi munic.**, Priekuļi parish, “Lejas Podiņi”, $25^{\circ} 21' 54.764''$ E $57^{\circ} 20' 55.159''$ N, 14.07.2015 (1, K. Aksjuta).

Eupithecia analoga Djakonov, 1926 – **Vecumnieki munic.**, Bārbele parish, “Gērķi”, $24^{\circ} 32' 25.085''$ E, $56^{\circ} 27' 40.494''$ N, 13.07.2016 (1, J. Dreimanis).

Eupithecia millefoliata Rössler, 1866 – **Auce munic.**, Auce parish, “Slavietiņas”, $22^{\circ} 59' 59.805''$ E $56^{\circ} 28' 6.195''$ N, 21.07.2016 (1, K. Aksjuta, M. Nitcīs).

Gagitodes sagittata (Fabricius, 1787) – **Kuldīga munic.**, Pelēči parish, “Bišavas”, $22^{\circ} 4' 7.229''$ E $56^{\circ} 53' 35.157''$ N, 07.07.2015 (1, K. Aksjuta), 11.08.2016 (1, K. Aksjuta, M. Nitcīs); **Talsi munic.**, Vandzene parish, “Dreimaņi”, $22^{\circ} 57' 35.279''$ E $57^{\circ} 21' 30.925''$ N, 31.07.2015 (1, K. Aksjuta).

Idaea humiliata (Hufnagel, 1767) – **Kuldīga munic.**, Pelēči parish, “Bišavas”, $22^{\circ} 4' 7.229''$ E $56^{\circ} 53' 35.157''$ N, 14.07.2015 (1, K. Aksjuta), 11.08.2016 (1, K. Aksjuta, M. Nitcīs).

Pareulype berberata (Denis & Schiffermüller, 1775) – **Auce munic.**, Auce parish, “Slavietiņas”, 22° 59' 59.805” E56° 28' 6.195” N, 29.06.2016 (1, K. Aksjuta, M. Nitcīs).

Peribatodes secundaria (Denis & Schiffermüller, 1775) – **Grobiņa munic.**, Gavieze parish, “Brieži”, 21° 23' 15.811” E, 56° 26' 40.897” N, 13.08.2015 (1, K. Aksjuta); **Kuldīga munic.**, Pelēči parish, “Bišavas”, 22° 4' 7.229” E 56° 53' 35.157” N, 31.07.2016 (1, E. Dreijers); **Auce munic.**, Auce parish, “Slavietiņas”, 22° 59' 59.805” E56° 28' 6.195” N, 11.08.2016 (1, K. Aksjuta, M. Nitcīs).

Perizoma lugdunaria (Herrich-Schäffer, 1855) – **Kuldīga munic.**, Pelēči parish, “Bišavas”, 22° 4' 7.229” E 56° 53' 35.157” N, 13.07.2016 (1, A. Pankjāns).

Scopula corrivalaria (Kretschmar 1862) – **Vecumnieki munic.**, Bārbele parish, Gerķi, 24° 32' 25.085” E, 56° 27' 40.494” N, 20.06.2016 (1, J. Dreimanis); **Krāslava munic.**, Izvalta parish, “Kļavinieši”, 27° 0' 13.771” E 55° 58' 27.621” N, 21.07.2015 (1, K. Aksjuta), 11.08.2016 (1, M. Balalaikins); **Krāslava munic.**, Robežnieki parish, “Dravieši”, 27° 37' 47.021” E 55° 58' 31.871” N, 21.07.2015 (1, M. Balalaikins), 20.06.2016 (1, M. Balalaikins).

Lampropteryx otregiata (Metcalfe, 1917) – **Vecumnieki munic.**, Bārbele parish, Gerķi, 24° 32' 25.085” E, 56° 27' 40.494” N, 20.06.2016 (1, J. Dreimanis); **Priekuļi munic.**, Priekuļi parish, “Lejas Podiņi”, 25° 21' 54.764” E 57° 20' 55.159” N, 14.07.2015 (1, K. Aksjuta); **Jaunjelgava munic.**, Sece parish, “Druvenieki”, 25° 21' 50.208” E 56° 27' 20.557” N, 04.08.2015 (1, J. Dreimanis); **Rugāji munic.**, Lazdukalna parish, Slavīti, 27° 3' 7.402” E 56° 54' 5.288” N, 22.06.2015 (1, D. Vasiļevskis), 18.08.2016 (1, D. Vasiļevskis); **Krāslava munic.**, Izvalta parish, “Kļavinieši”, 27° 0' 13.771” E 55° 58' 27.621” N, 29.06.2015 (1, K. Aksjuta); **Kārsava munic.**, Malnava parish, “Reiziņmājas”, 27° 47' 26.795” E 56° 48' 41.899” N, 21.07.2015 (1, M. Balalaikins), 11.08.2016 (1, M. Balalaikins);

Krāslava munic., Robežnieki parish, “Dravieši”, 27° 37' 47.021” E 55° 58' 31.871” N, 18.08.2015 (1, M. Balalaikins), 11.08.2016 (1, M. Balalaikins, I. Jakubāne).

Spargania luctuata (Denis & Schiffermüller, 1775) – **Priekuļi munic.**, Priekuļi parish, “Lejas Podiņi”, 25° 21' 54.764” E 57° 20' 55.159” N, 10.08.2015 (1, K. Aksjuta); **Krāslava munic.**, Izvalta parish, “Kļavinieši”, 27° 0' 13.771” E 55° 58' 27.621” N, 21.07.2016 (1, M. Balalaikins, I. Jakubāne).

Lasiocampidae Harris, 1841

Gastropacha populifolia (Esper, 1784) – **Grobiņa munic.**, Gavieze parish, “Brieži”, 21° 23' 15.811” E, 56° 26' 40.897” N, 20.06.2016 (1, E. Dreijers); **Talsi munic.**, Vandzene parish, “Dreimaņi”, 22° 57' 35.279” E 57° 21' 30.925” N, 21.07.2015 (1, K. Aksjuta); **Auce munic.**, Auce parish, “Slavietiņas”, 22° 59' 59.805” E56° 28' 6.195” N, 13.07.2016 (1, A. Pankjāns); **Madona munic.**, Sarkaņi parish, “Kalna Lindes”, 26° 10' 51.900” E 56° 53' 12.375” N, 04.08.2016 (1, G. Akmentins).

Lycaenidae Leach, 1815

Lycaena dispar (Haworth, 1802) – **Grobiņa munic.**, Strēļi, 21° 23' 53.069” E 56° 26' 23.136” N, 01.07.2015 (1, U. Valainis); **Krāslava munic.**, 150 metri to the N from Lake Mazais Gusena, near the road Robežnieki – Joņini, 27° 38' 0.456” E 55° 57' 28.475” N, 03.07.2015 (1, R. Cibuškis); **Limbaži munic.**, Saulgrieži, 24° 37' 13.258” E 57° 21' 44.136” N, 19.07.2016 (1, U. Piterāns); **Madona munic.**, Lazdukalns, 26° 9' 14.571” E 56° 53' 54.248” N, 10.06.2016 (1, G. Akmentiņš); **Rugāji munic.**, River Pīstēja, to the N from Bierzpiļs pūrs, 26° 59' 42.435” E 56° 54' 46.999” N, 19.06.2016 (1, G. Akmentiņš), 27° 0' 10.408” E 56° 54' 47.985” N, 10.06.2016 (1, G. Akmentiņš), 26° 59' 37.477” E 56° 54' 46.200” N, 30.06.2016 (1, G. Akmentiņš); **Vecumnieku munic.**, Kociņi, 24° 34' 9.624” E 56° 27' 30.305” N, 28.07.2016 (1, E. Ēmanis), 24° 34' 16.530” E 56° 27' 29.599” N, 27.07.2015 (1, E. Ēmanis).

Noctuidae Latreille, 1809

Acronicta tridens (Denis & Schiffermüller, 1775) – **Talsi munic.**, Vandzene parish, “Dreimanī”, 22° 57' 35.279" E, 57° 21' 30.925" N, 20.06.2016 (1, R. Abaja).

Amphipoea crinanensis (Burrows, 1908) – **Priekuļi munic.**, Priekuļi parish, “Lejas Podiņi”, 25° 21' 54.764" E, 57° 20' 55.159" N, 07.07.2016 (1, L. Taube).

Amphipyra berbera (Rungs, 1949) – **Kuldīga munic.**, Pelēči parish, “Bišavas”, 22° 4' 7.229" E, 56° 53' 35.157" N, 11.08.2016 (1, K. Aksjuta, M. Nitcis).

Apamea anceps (Denis & Schiffermüller, 1775) – **Grobiņa munic.**, Gavieze parish, “Brieži”, 21° 23' 15.811" E, 56° 26' 40.897" N, 10.07.2015 (1, K. Aksjuta), 11.08.2016 (1, K. Aksjuta, M. Nitcis); **Auce munic.**, Auce parish, “Slavietiņas”, 22° 59' 59.805" E, 56° 28' 6.195" N, 31.07.2016 (1, K. Aksjuta); **Jelgava munic.**, Eleja parish, “Kapteines”, 23° 43' 14.101" E 56° 27' 44.829" N, 22.06.2016 (1, M. Balalaikins), 29.06.2016 (1, M. Nitcis, K. Aksjuta).

Apamea lithoxylaea (Denis & Schiffermüller, 1775) – **Grobiņa munic.**, Gavieze parish, “Brieži”, 21° 23' 15.811" E, 56° 26' 40.897" N, 16.07.2015 (1, K. Aksjuta), 31.07.2016 (1, E. Dreijers); **Auce munic.**, Auce parish, “Slavietiņas”, 22° 59' 59.805" E, 56° 28' 6.195" N, 04.08.2016 (1, K. Aksjuta); **Priekuļi munic.**, Priekuļi parish, “Lejas Podiņi”, 25° 21' 54.764" E, 57° 20' 55.159" N, 13.07.2016 (1, L. Taube).

Callopistria juventina (Stoll, 1782) – **Vecumnieki munic.**, Bārbele parish, “Gērķi”, 24° 32' 25.085" E, 56° 27' 40.494" N, 14.07.2015 (1, J. Dreimanis), 29.06.2016 (1, J. Dreimanis); **Jaunjelgava munic.**, Sece parish, “Druvenieki”, 25° 21' 50.208" E 56° 27' 20.557" N, 07.07.2015 (1, J. Dreimanis), 21.07.2016 (1, J. Dreimanis). ***Calyptra thalictri*** (Borkhausen, 1790) – **Priekuļi munic.**, Priekuļi parish, “Lejas Podiņi”, 25° 21' 54.764" E, 57° 20' 55.159" N, 13.07.2016 (1, L. Taube); **Rugāji munic.**, Lazdukalna parish,

Slavīti, 27° 3' 7.402" E 56° 54' 5.288" N, 10.08.2015 (1, D. Vasiļevskis), 13.07.2016 (1, K. Aksjuta); **Kārsava munic.**, Malnava parish, “Reizīņmājas”, 27° 47' 26.795" E 56° 48' 41.899" N, 11.08.2016 (1, M. Balalaikins, I. Jakubāne).

Conisania luteago (Denis & Schiffermüller, 1775) – **Jelgava munic.**, Eleja parish, “Kapteines”, 23° 43' 14.101" E, 56° 27' 44.829" N, 04.08.2015 (1, K. Aksjuta); **Vecumnieki munic.**, Bārbele parish, “Gērķi”, 24° 32' 25.085" E, 56° 27' 40.494" N, 04.08.2015 (1, J. Dreimanis), 29.06.2016 (1, J. Dreimanis); **Madona munic.**, Sarkaņi parish, “Kalna Lindes”, 26° 10' 51.900" E 56° 53' 12.375" N, 21.07.2015 (1, G. Akmentins); **Krāslava munic.**, Robežnieki parish, “Dravieši”, 27° 37' 47.021" E 55° 58' 31.871" N, 07.07.2016 (1, M. Balalaikins, I. Jakubāne).

Cosmia affinis (Linnaeus, 1767) – **Jelgava munic.**, Eleja parish, “Kapteines”, 23° 43' 14.101" E, 56° 27' 44.829" N, 04.08.2015 (1, K. Aksjuta); **Vecumnieki munic.**, Bārbele parish, “Gērķi”, 24° 32' 25.085" E, 56° 27' 40.494" N, 04.08.2015 (1, J. Dreimanis), 29.06.2016 (1, J. Dreimanis); **Madona munic.**, Sarkaņi parish, “Kalna Lindes”, 26° 10' 51.900" E 56° 53' 12.375" N, 21.07.2015 (1, G. Akmentins); **Krāslava munic.**, Robežnieki parish, “Dravieši”, 27° 37' 47.021" E 55° 58' 31.871" N, 07.07.2016 (1, M. Balalaikins, I. Jakubāne).

Cucullia praecana Eversmann, 1843 – **Kuldīga munic.**, Pelēči parish, “Bišavas”, 22° 4' 7.229" E, 56° 53' 35.157" N, 21.07.2015 (1, K. Aksjuta), 29.06.2016 (1, M. Nitcis, K. Aksjuta); **Jelgava munic.**, Eleja parish, “Kapteines”, 23° 43' 14.101" E, 56° 27' 44.829" N, 07.07.2016 (1, K. Aksjuta, A. Pankjāns).

Deltote deceptoria (Scopoli, 1763) – **Jaunjelgava munic.**, Sece parish, “Druvenieki”, 25° 21' 50.208" E, 56° 27' 20.557" N, 31.07.2016 (1, J. Dreimanis).

Euchalcia modestoides (Denis & Schiffermüller, 1775) – **Grobiņa munic.**, Gavieze parish, “Brieži”, 21° 23' 15.811" E, 56° 26' 40.897" N, 24.07.2015 (1, K. Aksjuta); **Kuldīga munic.**, Pelēči parish, “Bišavas”, 22° 4' 7.229" E 56° 53' 35.157" N, 18.08.2015 (1, K. Aksjuta); **Auce munic.**, Auce parish, “Slavietiņas”, 22° 59' 59.805" E, 56° 28' 6.195" N, 25.07.2015 (1, K. Aksjuta), 20.06.2016 (1, M. Nycteola revayana (Scopoli, 1772) – **Grobiņa munic.**, Gavieze parish, “Brieži”, 21° 23' 15.811” E, 56° 26' 40.897” N, 11.08.2016 (1, K. Aksjuta, M. Nitcīs); **Jelgava munic.**, Eleja parish, “Kapteines”, 23° 43' 14.101” E 56° 27' 44.829” N, 21.07.2016 (1, Aksjuta, M. Nitcīs); **Krāslava munic.**, Robežnieki parish, “Dravieši”, 27° 37' 47.021” E 55° 58' 31.871” N, 20.06.2016 (1, M. Balalaikins).

Notodontidae Stephens, 1829

Pygaera timon (Hubner, 1803) – **Vecumnieki munic.**, Bārbele parish, Gerķi, 24° 32' 25.085” E, 56° 27' 40.494” N, 14.07.2015 (1, J. Dreimanis), 20.06.2016 (1, J. Dreimanis); **Madona munic.**, Sarkaņi parish, “Kalna Lindes”, 26° 10' 51.900” E 56° 53' 12.375” N, 21.07.2015 (1, G. Akmentīns), 21.07.2016 (1, G. Akmentīns).

Nymphalidae Rafinesque, 1815

Coenonympha hero (Linnaeus, 1761) – **Grobiņa munic.**, Nature Reserve “Brienamais purvs”, 21° 20' 14.530” E 56° 25' 19.382” N, 01.07.2015 (1, U. Valainis); **Jaunjelgava munic.**, to the N from Tīrais purvs, 25° 19' 45.816” E 56° 28' 13.658” N, 03.06.2016 (1, E. Ēmanis); **Rugāji munic.**, River Pīsteņa, to the N from Bierzpiļs pūrs, 26° 59' 42.435” E 56° 54' 46.999” N, 19.06.2016 (1, G. Akmentīns), 26° 59' 23.576” E 56° 54' 41.970” N, 19.06.2016 (1, G. Akmentīns).

Euphydryas aurinia (Rottemburg, 1775) – **Grobiņa munic.**, Strēli, 21° 24' 6.691” E 56° 26' 23.238” N, 10.06.2015 (1, U. Valainis); **Limbaži munic.**, Garkalni, 24° 36' 24.172” E 57° 21' 26.827” N, 20.06.2016 (1, U. Piterāns), 24° 36' 21.038” E 57° 21' 26.598” N, 02.07.2015 (1, U. Piterāns), Megari, 24° 37' 2.074” E 57° 21' 23.452” N, 20.06.2016 (1, U. Piterāns), Saulgrieži, 24° 37' 10.280” E 57° 21' 33.560” N, 20.06.2016 (1, U. Piterāns), 24° 37' 12.567” E 57° 21' 43.049” N 02.07.2015 (1, U. Piterāns).

Limenitis camilla (Linnaeus 1764) – **Auce munic.**, Slavietiņas, 23° 0' 7.431” E 56° 27' 52.780” N, 23.06.2016 (1, N. Savenkovs);

Grobiņa munic., Mētrāji, 21° 23' 12.291” E 56° 26' 25.445” N, 01.07.2015 (1, U. Valainis); **Limbaži munic.**, Garkalni, 24° 36' 4.719” E 57° 21' 25.390” N, 20.06.2016 (1, U. Piterāns); **Mērsrags munic.**, 1,2 km to the S from the road Vandzene – Uguņciems, 22° 57' 10.348” E 57° 20' 56.081” N, 19.07.2016 (1, K. Vilks); **Priekuļi munic.**, Leukādijas, 25° 22' 5.723” E 57° 22' 4.120” N, 13.06.2016 (1, U. Piterāns).

Lopinga achine (Scopoli, 1763) – **Limbaži munic.**, Garkalni, 24° 36' 15.289” E 57° 21' 26.178” N, 20.06.2016 (1, U. Piterāns), 24° 36' 50.220” E 57° 21' 30.598” N, 20.06.2016 (1, U. Piterāns), Saulgrieži, 24° 37' 9.926” E 57° 21' 38.994” N, 08.06.2016 (1, U. Piterāns).

Papilionidae Latreille, 1802

Parnassius mnemosyne (Linnaeus, 1758) – **Kuldīga munic.**, Līči, 22° 3' 34.353” E 56° 54' 29.697” N, 11.06.2016 (1, N. Savenkovs), 22° 3' 39.980” E 56° 54' 28.916” N, 11.06.2016 (1, N. Savenkovs).

Beetles (Coleoptera)

Carabidae Latreille, 1802

Amara nigricornis Thomson, 1857 – **Madona munic.**, Stalīdzēni, 26° 9' 31.291”, E 56° 53' 33.518” N, 13.06.2016 (3, K. Aksjuta).

Carabus convexus Fabricius, 1775 – **Kuldīga munic.**, Novadnieki, 22° 4' 13.852” E 56° 54' 19.696” N, 11.08.2015 (1, M. Nitcīs, K. Aksjuta); **Talsi munic.**, “Cepliņi”, 22° 57' 39.568” E 57° 21' 54.391” N, 05.08.2015 (1, M. Nitcīs, K. Aksjuta), 320 m to the E from “Silmāji”, 22° 58' 39.498” E 57° 21' 23.043” N, 08.06.2015 (1, M. Nitcīs, K. Aksjuta); **Mērsrags munic.**, 1,2 km to The S from road Vandzene – Uguņciems, 22° 57' 42.360” E 57° 20' 49.985” N, 05.08.2016 (1, M. Nitcīs, K. Aksjuta), 22° 57' 41.461” E 57° 20' 49.520” N, 08.06.2015 (1, M. Nitcīs, K. Aksjuta).

Carabus coriaceus Linnaeus, 1758 – **Grobiņa munic.**, 1,6 km to the SW from “Susta”, 21° 20'

54.002° E 56° 26' 1.225" N, 10.06.2015 (1, M. Nitcis, K. Aksjuta), 10.06.2016 (1, M. Nitcis, K. Aksjuta), 21° 20' 54.338" E 56° 26' 1.683" N, 10.08.2015 (1, M. Nitcis, K. Aksjuta), "Susta", 21° 21' 50.621" E 56° 26' 35.000" N, 18.08.2016 (1, A. Pankjāns, K. Aksjuta), 1,2 km to the SW from "Brieži", 21° 22' 51.200" E 56° 26' 4.174" N, 10.08.2015 (1, M. Nitcis, K. Aksjuta), 21° 22' 50.795" E 56° 26' 3.584" N, 10.06.2016 (1, M. Nitcis, K. Aksjuta), 17.08.2015 (1, A. Pankjāns, K. Aksjuta), 18.06.2016 (1, A. Pankjāns, M. Nitcis), "Lielais mežs", 1,5 km to the E from "Briena māis purvs", 21° 21' 54.572" E 56° 25' 30.145" N, 10.08.2015 (1, M. Nitcis, K. Aksjuta), 18.06.2015 (1, M. Nitcis, K. Aksjuta); **Auce munic.**, 1 km to the N from Lielvaicēni, 22° 58' 10.475" E 56° 27' 27.915" N, 11.06.2015 (1, M. Nitcis, K. Aksjuta), 10.08.2015 (1, M. Nitcis, K. Aksjuta), 800 m to the W from "Slavietiņas", 22° 59' 8.156" E 56° 28' 0.821" N, 10.08.2015 (1, M. Nitcis, K. Aksjuta), 2km to the NE from Lielvaicēni, 23° 0' 7.673" E 56° 27' 29.145" N, 17.08.2015 (1, M. Nitcis, K. Aksjuta), 18.06.2016 (1, A. Pankjāns).

Olisthopus rotundatus (Paykull, 1790) – **Jelgava munic.**, Eleja parish, Zizma, 23° 43' 57.809" E 56° 27' 43.344" N, 17.06.2016 (1, A. Pankjāns, K. Aksjuta).

Sphaeritidae Shuckard, 1839

Sphaerites glabratus (Fabricius, 1792) – **Madona munic.**, Stalīdzēni, 26° 11' 28.658" E 56° 53' 30.490" N, 13.06.2016 (1, K. Aksjuta).

ACKNOWLEDGEMENTS

For the presented data, we are grateful to the whole monitoring team: G. Akmentiņš, R. Cibulskis, K. Daudziņa, E. Dreijers, J. Dreimanis, E. Ēmanis, I. Jakubāne, A. Lanka, M. Nitcis, A. Pankjāns, U. Piterāns, Z. Striķe, L. Taube, D. Vasiļevskis, K. Vilks. For assistance with identification scientific specimens of beetles, we thank A. Anichtchenko.

Monitoring was supported by the Nature Conservation Agency, Biodiversity monitoring program, invertebrates monitoring (2015 – 2017), agreement No 7.7/58/2105-P.
